Computer Wholesalers, Inc. (CWI) Obtains ISO 9001 Certification with Assistance from Integration Technologies Group (ITG)

FALLS CHURCH, VA - December 12, 2011 – CWI, a provider of IT asset recovery and remarketing services has obtained ISO 9001:2008 certification with the assistance of Integration Technologies Group, Inc. (ITG) Best Practices consulting services. “CWI selected ISO 9001:2008 as the framework to define our current processes and ensure that our customers receive the same level of service across our locations” said Ivan Somyk, CWI President. “CWI sees ISO 9001 as an opportunity to convey our commitment to managing our quality processes, a customer driven approach and a focus on continual improvement that translates into a greater level of comfort for our customers when dealing with CWI.” ITG works with companies to help them obtain globally recognized certifications such as ISO 9001. “CWI’s commitment to quality has been evident throughout this process” says ITG’s Vice President of Quality Standards and Performance, Markus Darby. “Adding ISO 9001 practices to complement the high caliber staff and technology already employed means that CWI customers will receive unparalleled IT remarketing services.”

In addition to being better positioned to bid on new contracts, CWI now has a proven quality management system structure in place to help manage day-to-day operations. Somyk notes that “CWI has always been committed to total customer satisfaction; now with an independent audit provided by the ISO 9001 certification process we can provide additional evidence of the strength of our commitment along with the assurances that come with being certified to an international best practice standard.”

About CWI

For nearly 20 years CWI has offered warranted, high quality, IT asset recovery and remarketing services to companies of all sizes. Since our inception we have been consistently recognized and respected as an industry leader in IT asset recovery and remarketing. Our services will help your company receive maximum value for retired, depreciated, or unwanted computer and IT assets.
