Integration Technologies Group, Inc. Announces the Promotion of Heather Reis

Falls Church, VA – January 29, 2014 - Integration Technologies Group, Inc. (ITG), an IT products and services company providing Best Practices consulting, IT managed services, accessibility, video-teleconferencing and enterprise solutions, has announced the promotion of Heather Reis to the position of Vice President – Quality Standards and Performance.

Heather’s promotion is in part due to the rapid growth of the professional services and consulting support solutions that ITG provides to commercial organizations. “Our continued success in helping organizations achieve the process improvement initiatives have allowed us the opportunity to promote Heather to her new role where she will be responsible for the identification, development, and delivery of consulting services to customers” says Markus Darby ITG’s Executive Vice President and General Manager.

“Heather’s promotion is a positive step in ITG’s Best Practices consulting operations as she will focus on our strategy of expanding the product offerings and promoting entry into new markets,” states Darby.

Heather Reis Bio

Heather Reis has over ten years’ experience in process improvement and quality management. Heather has been a senior ITG contributor and manager for the past three years, providing strategic guidance and oversight to a range of customers. Heather’s previous experience includes work at a global ISO registrar including roles in global account management, business development, auditing, and quality management.

About ITG Best Practices Services

Integration Technologies Group provides ISO 9001, ISO 20000, ISO 27001, CMMI® for Services and CMMI® for Development, consulting, internal auditing and training support. Since 2006 ITG has been providing Best Practices consulting and software solutions to help commercial organizations achieve successful certifications or appraisals while focusing on improving business performance. ITG has worked with a wide variety industry verticals in the service and manufacturing sectors to implement ISO standards and the CMMI® framework in timeframes as short as three months.
